Elective Courses

Elective coursework is available in many topic areas, including education, diabetes, human lactation, dermatology and low back pain. Students should see their advisor for assistance with elective choices.

DNP Project

Students complete an evidence-based project. Students work collaboratively with at least one graduate nursing faculty member who is chairperson of their committee and one other graduate faculty member to identify an evidence-based practice problem and plan the implementation to address the problem. Successful defense of the evidence-based project proposal is the expected outcome within the Evidence-Based Project III course. After successful completion and defense of the Evidence-Based Project III proposal, the candidate may enroll in residency hours. The residency allows the student to complete/disseminate the results of the project and develop a portfolio documenting practice scholarship. The residency hours may be taken in 2-, 4- or 6-hour increments and may be repeated until requirements are met. The candidate completes an oral defense of the project at the end of the residency.

Applied Learning

Students in the DNP FNP program are required to complete an applied learning or research experience to graduate from the program. The requirement can be met by completing all coursework culminating with the DNP Project. This evidence-based project stems from a series of courses and practicum work and is finalized and defended during the NURS 960 residency course.
