FYMU 102C. First-Year Seminar: The Marcussen, Wiedemann and You (3).

General education fine arts course. Discover through the great Marcussen pipe organ in Wiedemann Hall the multiplicity of tools and skills needed to make this giant instrument/machine function on multiple levels. One level is the instrument itself. What went into its construction? And what professions were used? Another level is about the person who operates/plays this complicated instrument. How does one acquire this knowledge; what does it take; and how long does it take to become an expert? The course compares these things with other professions in today's world - those in art, architecture, electronics and engineering, to name a few. Today there are more tools than ever on a growing variety of platforms to accomplish various tasks, jobs, and in short, everything in people's lives. Learn through the example provided right here on campus of the Marcussen organ in Wiedemann Hall.
