

## Biochemistry Field Major

The department of biological sciences and the department of chemistry and biochemistry participate jointly in this program. Students selecting this major should seek the advice of one of the departmental chairpersons as early as possible.

### Program Requirements

A minimum total of 120 credit hours is required for the field major in biochemistry. The department of biological sciences and the department of chemistry and biochemistry participate jointly in this program. Students selecting this major should seek the advice of one of the departmental advisors or chairpersons as early as possible. In addition to meeting the requirements of the WSU General Education Program (<http://catalog.wichita.edu/undergraduate/academic-information/general-education-program/>) and the requirements of Fairmount College of Liberal Arts and Sciences, students in the field major in biochemistry must take the following courses:
