Certificate in Design Thinking

From Fortune 100 to entrepreneurial start-ups, design thinking methods and design sprints are used by companies competing in fast-moving environments who are facing transformation in their industry, looking to build a culture of innovation, manage change, align teams, and differentiate their brand. Design thinking processes are adaptable to any business environment and are highly effective for companies seeking a consistent approach to problem-solving, service and product development that is efficient, innovative and reduces risks through rapid prototyping and testing.

Learn more about design thinking at Wichita State University on the Design Thinking for Innovation website (https://www.wichita.edu/academics/college-of-innovation-and-design/master-innovation-design/design-thinking.php)[1].
